Dear Professor Güven:

We are pleased to inform you that the next event of the Tihany Symposium series, the 11th Tihany Symposium on Radiation Chemistry will be held in Eger, August 26-31, 2006.

The series of “Tihany” Symposia on Radiation Chemistry aims to promote worldwide scientific and technical collaboration among scientists involved in various aspects of radiation research and applications in a stimulating and thought-provoking environment. The first Symposium was held in Tihany in 1962 and since then has been held every four years. Most recent meetings were in Tata (1998) and Sopron (2002). The last meeting was attended by more than 150 researchers from 36 countries worldwide (http://www.10thtihany.kfki.hu). The next meeting is expected to attract about the same number of participants. The official web-page of the Symposium is now under construction, and can be found at: www.tihany.kfki.hu. It will be updated regularly.

The scientific program of the Symposium is arranged by the local organizing committee with advice from an international scientific committee. The program covers all the major disciplines of both basic and applied radiation chemistry, with invited speakers and oral and poster contributions from participants. All contributions will be published (after peer review) in a special issue of the Radiation Physics and Chemistry.

On behalf of the Organizing Committee we are pleased to invite you to present a lecture of 30 min (including discussion) on your research topic. In order to be able to keep up with the schedule of the organization, we would appreciate to receive your kind answer as soon as possible, but not later than June 1st, 2005. Would you prefer an official invitation letter sent by regular mail or fax, please let us know. If you accept our invitation, please be so kind and give us a provisional title of the lecture.

Would you require any additional information please do not hesitate to contact us. Looking forward to receiving your positive answer and welcoming you in Eger.

Sincerely yours,

Chairs of the Organizing Committee
Agnes Safrany and Andras Kovacs
